## Package 'ObMiTi'

May 15, 2025

· · · · · · · · · · · · · · · · · · ·
Type Package
Title Ob/ob Mice Data on Normal and High Fat Diet
Version 1.17.0
<b>Year</b> 2021
<b>Description</b> The package provide RNA-seq count for 2 strains of mus musclus; Wild type and Ob/Ob. Each strain was divided into two groups, and each group received either chow diet or high fat diet. RNA expression was measured after 20 weeks in 7 tissues.
License GPL-3
URL https://github.com/OmarElAshkar/ObMiTi
BugReports https://github.com/OmarElAshkar/ObMiTi/issues
Encoding UTF-8
RoxygenNote 7.1.1
<b>Depends</b> R (>= 4.1), SummarizedExperiment, ExperimentHub
Suggests knitr, rmarkdown, BiocManager, GenomicFeatures, S4Vectors, devtools, testthat
VignetteBuilder knitr
biocViews ExperimentHub, GEO, RNASeqData

ObMiTi

ObMiTi package

## **Description**

Title: Ob/ob Mice Data on Normal and High Fat Diet The package provide RNA-seq count for 2 strains of mus musclus; Wild type and Ob/Ob. Each strain was divided into two groups, and each group received either chow diet or high fat diet. RNA expression was measured after 12 weeks in 7 tissues.

#### **Details**

The dataset can be accessed through the ExperimentHub as a RangedSummarizedExperiment object contains:

**assay** The read counts matrix.

colData The phenotype data of the samples

rowRanges The feature data and annotation of the peaks.

**metadata** extra details about the sample and associated phenotype studies. This is a data. frame of bibliography information of the studies from which the samples were collected for.

### **Examples**

```
# load the data object
library(ExperimentHub)

# query package resources on ExperimentHub
eh <- ExperimentHub()
query(eh, "ObMiTi")

# load data from ExperimentHub
ob_counts <- query(eh, "ObMiTi")[[1]]

# print object
ob_counts</pre>
```

# Index

 $\texttt{ObMiTi}, \textcolor{red}{2}$
