Package ‘NCIgraph’

April 26, 2017

Title Pathways from the NCI Pathways Database
Version 1.24.0
Date 2012-04-27
Author Laurent Jacob
Maintainer Laurent Jacob <laurent.jacob@gmail.com>
Description Provides various methods to load the pathways from the NCI Pathways Database in R graph objects and to re-format them.
License GPL-3
LazyLoad yes
Imports graph, KEGGgraph, methods, RBGL, RCytoscape, R.methodsS3
Depends graph, R (>= 2.10.0)
Suggests Rgraphviz
Enhances DEGraph
biocViews Pathways, GraphAndNetwork
NeedsCompilation no

**directedBFS**

*Uses a breadth first search on a directed graph to identify which genes are regulated by a particular node in the graph.*

**Description**

Uses a breadth first search on a directed graph to identify which genes are regulated by a particular node in the graph.

**Usage**

`directedBFS(g, node)`

**Arguments**

- `g`  
  A graph object.
- `node`  
  A node of `g`.

**Value**

A structured list containing the regulated genes and the type of interaction between node and each gene.

**Author(s)**

Laurent Jacob

**See Also**

`propagateRegulation()`

---

**edgesToMerge**

*Identifies edges that should be merged to parse a NCI network.*

**Description**

Identifies edges that should be merged to parse a NCI network.

**Usage**

`edgesToMerge(g)`

**Arguments**

- `g`  
  A graph object.

**Value**

A list of edges to be merged
getNCIPathways

Author(s)
Laurent Jacob

parseNCInetwork()

getNCIPathways  Loads networks from Cytoscape and parses them

Description
Loads networks from Cytoscape and parses them.

Usage
getNCIPathways(cyList=NULL, parseNetworks=TRUE, entrezOnly=TRUE, verbose=FALSE)

Arguments
cyList  
A list providing the networks loaded from Cytoscape. If NULL, the function will try to build the list from Cytoscape.
verbose  
If TRUE, extra information is output.
parseNetworks  
A logical. If FALSE, the raw NCI networks are returned as graphNEL objects. If TRUE, some additional parsing is performed by the parseNCInetwork function.
entrezOnly  
A logical. If TRUE, only keep nodes with an entrezID property.

Value
A list of two elements: pList, a list of graphNEL objects, and failedW a list containing the names of the networks that R failed to read from cytoscape.

Author(s)
Laurent Jacob

parseNCInetwork()

Examples
#-------------------------------
## Load NCIgraph
#-------------------------------
library(NCIgraph)
#-------------------------------
## Example 1: with Cytoscape
#-------------------------------
# getSubtype.NCIgraph

Returns a list of \texttt{KEGGEdgeSubType} objects describing each edge of the NCI network.

## Description

Returns a list of \texttt{KEGGEdgeSubType} objects describing each edge of the NCI network.

## Usage

\texttt{getSubtype.NCIgraph(object)}

## Arguments

- \texttt{object} 
  An \texttt{NCIgraph} object.

## Value

A list of \texttt{KEGGEdgeSubType} objects.

## Author(s)

Laurent Jacob

## Examples

\begin{verbatim}
# Load NCIgraph
library(NCIgraph)
\end{verbatim}
is.NCIgraph

Assess whether a graph is a NCI graph

Description

Assess whether a graph is a NCI graph.

Usage

is.NCIgraph(gr)

Arguments

   gr   A graph object.

Value

A logical, TRUE if the graph is a NCI graph, FALSE otherwise.

Author(s)

Laurent Jacob

See Also

parseNCInetwork()
mergeNodes

*Merges a given list of nodes in a graph*

**Description**

Merges a given list of nodes in a graph.

**Usage**

```r
mergeNodes(g, mEdges, separateEntrez=TRUE, entrezOnly=TRUE)
```

**Arguments**

- `g`: A graph object.
- `mEdges`: A list of nodes to be merged.
- `separateEntrez`: A logical. If TRUE, don’t merge two nodes with entrezID.
- `entrezOnly`: A logical. If TRUE, only keep nodes with an entrezID property.

**Value**

The updated graph object

**Author(s)**

Laurent Jacob

**See Also**

`parseNCInetwork()`

---

NCI.demo.cyList

*10 raw NCI networks from Nature curated pathways and BioCarta imported as graphNEL objects, for demonstration purpose*

**Description**

These are the ten first elements of the full list of raw networks that can be downloaded using the downloadCyLists.R script.

**Usage**

```r
NCI.demo.cyList
```

**Format**

A list of 10 graphNEL objects.

**Author(s)**

Laurent Jacob
NCIgraph

Examples

```r
data("NCIgraphVignette")
length(NCI.demo.cyList)

library(Rgraphviz)
plot(NCI.demo.cyList[[1]])
```

NCIgraph

Class NCIGraph

Description

Package: NCIgraph

Class NCIgraph

public static class NCIgraph
extends graphNELObject

Class extending graphNEL for graphs built from NCI gene networks.

Author(s)

Laurent Jacob

parseNCINetwork

Takes a NCI network and transforms it into a simpler graph only representing inhibition/activation relationships between genes.

Description

Takes a NCI network and transforms it into a simpler graph only representing inhibition/activation relationships between genes.

Usage

parseNCINetwork(g, propagateReg=TRUE, separateEntrez=TRUE, mergeEntrezCopies=TRUE, entrezOnly=TRUE)

Arguments

- `g` A graph object.
- `propagateReg` A logical. If TRUE, use propagateRegulation to transform the network before parsing it.
- `separateEntrez` A logical. If TRUE, don’t merge two nodes with entrezID.
- `mergeEntrezCopies` A logical. If TRUE, merge resulting nodes that have the same entrezID.
- `entrezOnly` A logical. If TRUE, only keep nodes with an entrezID property.
propagateRegulation

Value

The new graph object.

Author(s)

Laurent Jacob

Examples

```r
## Load NCIgraph
library(NCIgraph)

## Get some raw networks
data("NCIgraphVignette", package="NCIgraph")

## Parse the first of them
parsedNetwork <- parseNCInetwork(NCI.demo.cyList[[1]], propagateReg=TRUE, separateEntrez=TRUE, mergeEntrezCopies=TRUE)
```

Description

Transforms the network in a way that each Biochemical Reaction node pointing to a Complex points to what is regulated by the complex and updates the interaction types accordingly.

Usage

```r
propagateRegulation(g)
```

Arguments

- `g`: A graph object.

Value

The updated graph object

Author(s)

Laurent Jacob

See Also

parseNCInetwork()
translateNCI2GeneID

Given the entrezID corresponding to the nodes of a graph.

Usage

`translateNCI2GeneID(g)`

Arguments

- `g`: A graph object.

Value

A vector of character giving the entrez ID of the nodes of `g`.

Author(s)

Laurent Jacob

See Also

`parseNCINetwork()`

Examples

```r
###-----------------------------
### Load NCIgraph
###-----------------------------

library(NCIgraph)

### Get some raw networks
data("NCIgraphVignette", package="NCIgraph")

### Parse them
grList <- getNCIPathways(cyList=NCI.demo.cyList, parseNetworks=TRUE, entrezOnly=TRUE, verbose=TRUE)$pList

### Get the gene ids for the first of them

gids <- translateNCI2GeneID(grList[[1]])
```
