Package ‘OLINgui’

March 29, 2017

Version 1.48.0
Title Graphical user interface for OLIN
Author Matthias Futschik <mfutschik@ualg.pt>
Maintainer Matthias Futschik <mfutschik@ualg.pt>
Depends R (&gt;= 2.0.0), OLIN (&gt;= 1.4.0)
Imports graphics, marray, OLIN, tcltk, tkWidgets, widgetTools
Description Graphical user interface for the OLIN package
biocViews Microarray, TwoChannel, QualityControl, Preprocessing, Visualization
License GPL-2
URL http://olin.sysbiolab.eu

\textbf{R topics documented:}

\begin{itemize}
\item \texttt{OLINgui} \texttt{Graphical user interface for OLIN package}
\end{itemize}

\begin{itemize}
\item Description
\end{itemize}

The function \texttt{OLINgui} provides a graphical user interface for visualisation, normalisation and quality testing of two-channel microarray data. It is based on the functions of the OLIN package.

\begin{itemize}
\item Usage
\end{itemize}

\texttt{OLINgui()}

\begin{itemize}
\item
\end{itemize}
Details

The function `OLINgui` launches a graphical user interface for the OLIN package. It is based on Tk widgets using the R TclTk interface by Peter Dalgaard. It also employs some pre-made widgets from the tkWidgets Bioconductor-package by Jianhua Zhang for the selection of objects/files to be loaded.

OLINgui provides a conviennt interface to most functionalities of the OLIN package without restric-
tion of options. An exception is the visualisaton, where default arguments for plotting are used. To fine-tune plots, the underlying plotting functions in the OLIN package can be applied.

The usage of OLINgui assumes existing marray objects for the batch of arrays to be analysed and normalised. To construct marray objects using a graphical interface, refer to `read.marrayRaw`.

Some underlying functions (e.g. `mxy2.plot` and optionally `olin`) require an additional list of X- and Y-coordinates of spots. This has to be done “by hand” yet. However, most functions do not need this list.

For a overview of the functionality of OLINgui, please refer to the package documentation.

Value

OLINgui returns a tclObj object.

Note

The newest versions of OLINgui can be found at the OLIN webpage (http://itb.biologie.hu-berlin.de/~futschik/software/R/olin).
