Package ‘OLINgui’

January 30, 2017

Version 1.48.0
Title Graphical user interface for OLIN
Author Matthias Futschik <mfutschik@ualg.pt>
Maintainer Matthias Futschik <mfutschik@ualg.pt>
Depends R (>= 2.0.0), OLIN (>= 1.4.0)
Imports graphics, marray, OLIN, tcltk, tkWidgets, widgetTools
Description Graphical user interface for the OLIN package
biocViews Microarray, TwoChannel, QualityControl, Preprocessing, Visualization
License GPL-2
URL http://olin.sysbiolab.eu
NeedsCompilation no

OLINgui

Graphical user interface for OLIN package

Description

The function OLINgui provides a graphical user interface for visualisation, normalisation and quality testing of two-channel microarray data. It is based on the functions of the OLIN package.

Usage

OLINgui()
Details

The function \texttt{OLINgui} launches a graphical user interface for the OLIN package. It is based on Tk widgets using the R TclTk interface by Peter Dalgaard. It also employs some pre-made widgets from the tkWidgets Bioconductor-package by Jianhua Zhang for the selection of objects/files to be loaded.

\texttt{OLINgui} provides a convienient interface to most functionalities of the OLIN package without restriction of options. An exception is the visualisaton, where default arguments for plotting are used. To fine-tune plots, the underlying plotting functions in the OLIN package can be applied.

The usage of \texttt{OLINgui} assumes existing marray objects for the batch of arrays to be analysed and normalised. To construct marray objects using a graphical interface, refer to \texttt{read.marrayRaw}.

Some underlying functions (e.g. \texttt{mxy2.plot} and optionally \texttt{olin} ) require an additional list of X- and Y-coordinates of spots. This has to be done “by hand” yet. However, most functions do not need this list.

For a overview of the functionality of \texttt{OLINgui}, please refer to the package documentation.

Value

\texttt{OLINgui} returns a tclObj object.

Note

The newest versions of \texttt{OLINgui} can be found at the OLIN webpage (http://itb.biologie.hu-berlin.de/~futschik/software/R/OLIN).
