BSgenome.Mmusculus.UCSC.mm10

February 28, 2017

Description

Full genome sequences for Mus musculus (Mouse) as provided by UCSC (mm10, Dec. 2011) and stored in Biostrings objects.

Note

This BSgenome data package was made from the following source data files:

chr1.fa.gz chr2.fa.gz chr3.fa.gz chr4.fa.gz chr5.fa.gz chr6.fa.gz chr7.fa.gz chr8.fa.gz chr9.fa.gz chr10.fa.gz ... chrUn_GL456392.fa.gz chrUn_GL456393.fa.gz chrUn_GL456394.fa.gz chrUn_GL456396.fa.gz chrUn_JH584304.fa.gz
from http://hgdownload.cse.ucsc.edu/goldenPath/mm10/chromosomes/

See ?BSgenomeForge and the BSgenomeForge vignette (vignette("BSgenomeForge")) in the BSgenome software package for how to make a BSgenome data package.

- The BSgenomeForge vignette (vignette("BSgenomeForge")) in the **BSgenome** software package for how to make a BSgenome data package.
**Examples**

```r
BSgenome.Musculus.UCSC.mm10
genome <- BSgenome.Musculus.UCSC.mm10
seqlengths(genome)
genome$chr1 # same as genome["chr1"]
```

```r
# Upstream sequences
# The upstream sequences for mm10 (i.e. the sequences 1000 bases
# upstream of annotated transcription starts) can easily be extracted
# from the full genome sequences with something like:

library(TxDb.Musculus.UCSC.mm10.knownGene)
txdb <- TxDb.Musculus.UCSC.mm10.knownGene
gn <- sort(genes(txdb))
up1000 <- flank(gn, width=1000)
up1000seqs <- getSeq(genome, up1000)
```

```r
# IMPORTANT: Make sure you use a TxDb package (or TranscriptDb object),
# that contains a gene model based on the exact same reference genome
# as the BSgenome object you pass to getSeq(). Note that you can make
# your own custom TranscriptDb object from various annotation resources.
# See the makeTranscriptDbFromUCSC(), makeTranscriptDbFromBiomart(),
# and makeTranscriptDbFromGFF() functions in the GenomicFeatures
# package.

# Genome-wide motif searching
# See the GenomeSearching vignette in the BSgenome software
# package for some examples of genome-wide motif searching using
# Biostrings and the BSgenome data packages:
if (interactive())
  vignette("GenomeSearching", package="BSgenome")
```
