HuExExonProbesetLocation

Exon-level chromosome location data for microarrays of type HuEx.

Description

This data object was automatically created by the package AnnotationDbi version 1.11.8.

Usage

data(HuExExonProbesetLocation)

Format

A data frame with 1432143 rows and 7 columns, as follows.

EPROBESETID    exon-level probeset id
CHR             chromosome
STRAND          chromosome strand
START           start position of the Probe Selection Region on chromosome
END             end position of the Probe Selection Region on chromosome
GPROBESETID     Gene-level probeset id
ANNLEVEL        annotation level

Source

The exon-level probeset genome location was retrieved from Netaffx using AffyCompatible.

Examples

library(HuExExonProbesetLocationHg19)
