Annotation package that provides correspondence between MeSH ID and Entrez Gene ID

Description
This data represents a collection of annotation packages that can be used as a single object named as package name. This object can be used with the standard four accessor method for all AnnotationDbi objects. Namely: columns, keytypes, keys and select. Users are encouraged to read the vignette from the MeSHDbi package for more details.

Usage
MeSH.Dgr.eg.db

Author(s)
Koki Tsuyuzaki

Examples
library(MeSH.Dgr.eg.db)
