Package ‘FunciSNP.data’

April 26, 2017

Type Package
Title Various data sets for use with the FunciSNP package
Version 1.12.0
Date 2012-05-18
Author Simon G. Coetzee <simon@simoncoetzee.com> and Houtan Noushmehr, PhD <houtan@usp.br>
Maintainer Simon G. Coetzee <scoetzee@gmail.com>
biocViews SNPData, Project1000genomes, ENCODE
Depends R (>= 2.14.0), IRanges
Imports rtracklayer
Description Data sets needed for FunciSNP to integrate information from GWAS, 1000genomes and chromatin feature, in order to identify functional SNP in coding or non-coding regions.
License GPL-3
URL http://coetzeeseq.usc.edu/publication/Coetzee_SG_et_al_2012/
LazyData yes
NeedsCompilation no

R topics documented:

- FunciSNP.builtin.features
- lincRNA.hg19.rda
- refseqgenes.rda

Index 4

FunciSNP.builtin.features

*Builtin biological features used by FunciSNP package*
Description

These data were taken from the UCSC table browser and Encode website. Data retrieved on March of 2012. They include CTCF sites do not overlap a known Encode DNaseI site, Encode DNaseI site containing a CTCF site, Encode DNaseI not containing a CTCF site, ENCODE FAIRE clusters, promoters of known genes defined by -1000 and +100bp of a known transcription start site (TSS). These data were created to be used in the vignette for the FunciSNP package.

Usage

ctcf_only
cencode_dnase1_only
cencode_dnase1_with_ctcf
cencode_faire
known_gene_promoters

dim(ctcf_only);
dim(cencode_dnase1_only);
dim(cencode_dnase1_with_ctcf);
dim(cencode_faire);
dim(knows_gene_promoters);
class(ctcf_only);

Details

Each data set was extracted from the ENCODE and/or UCSC table browser on March of 2012. We retained only autosomal and sex linked chromosomes, removing unknown and random chromosomes. See reference for detail information on how these bed files were generated. Objects are stored as RangedData.

class(ctcf_only);

lincRNA.hg19.rda Known long intergenic non coding RNA

Description

This data is taken from the UCSC table browser. Data retrieved on March of 2012. This data was created to be used in the vignette for the FunciSNP package.
Usage

lincRNA
