zfGenes  Zebrafish RNA-Seq Experimental Data from Ferreira et al. (2014)

Description

Gene-level read counts from the RNA-Seq experiment of Ferreira et al. (2014). The data correspond to RNA libraries for three pairs of gallein-treated and control embryonic zebrafish cell pools. Please see the vignette for details on pre-processing.

Usage

data(zfGenes)

Source

A citation for the dataset can be generated using citation("zebrafishRNASeq").
