Package ‘BiocHubsShiny’

Type Package
Title View AnnotationHub and ExperimentHub Resources Interactively
Version 1.2.0
Description A package that allows interactive exploration of AnnotationHub and ExperimentHub resources. It uses DT / DataTable to display resources for multiple organisms. It provides template code for reproducibility and for downloading resources via the indicated Hub package.
License Artistic-2.0
Encoding UTF-8
Depends R (>= 4.3.0), shiny
Imports AnnotationHub, ExperimentHub, DT, htmlwidgets, S4Vectors, shinyAce, shinyjs, shinythemes, shinytoastr, utils
Suggests BiocManager, BiocStyle, knitr, rmarkdown, sessioninfo, shinytest2
biocViews Software, ShinyApps

Index ................................................................................. 3

BiocHubsShiny Initialize the shiny application for Bioconductor Hub resources

Description

The shiny app will allow the user to view a table of either AnnotationHub or ExperimentHub resources depending on the sidebar selection. It provides example code for downloading the selected resources.

Usage

BiocHubsShiny(...)

Arguments

... Further arguments to the runApp function

Details

Note. The code here was adapted from interactiveDisplayBase and ?'display,Hub-method' which are now deprecated.

Value

Mainly called for the side effect of displaying the shiny app in a browser

Examples

if (interactive()) {
  BiocHubsShiny()
}
Index

AnnotationHub, 2
