JASPAR2024()
```

## Value

```
JASPAR2024-class
```

## Slots

db Object of class "character" a character string of the path of SQLite file.

## Author(s)

Damir Baranasic

## Examples

```
library(JASPAR2024)
library(RSQLite)

JASPAR2024 <- JASPAR2024()
JASPARConnect <- RSQLite::dbConnect(RSQLite::SQLite(), db(JASPAR2024))
RSQLite::dbGetQuery(JASPARConnect, 'SELECT * FROM MATRIX LIMIT 5')
dbDisconnect(JASPARConnect)
```

---

db	<i>Access database from JASPAR2024 object</i>
----	---

---

**Description**

The accessor function for retrieving the location of the database location slot from the JASPAR2024 object

**Usage**

```
db(object)
```

```
## S4 method for signature 'JASPAR2024'  
db(object)
```

**Arguments**

object            JASPAR2024 class object

**Value**

Returns the location of the JASPAR2024.sqlite file

**Author(s)**

Damir Baranasic

**Examples**

```
library(JASPAR2024)  
JASPAR2024 <- JASPAR2024()  
db(JASPAR2024)
```
