MeSH.PCR.db

*Annotation package that provides correspondence between MeSH ID and Entrez Gene ID*

---

## Description

This data represents a collection of annotation packages that can be used as a single object named as package name. This object can be used with the standard four accessor method for all AnnotationDbi objects. Namely: columns, keytypes, keys and select. Users are encouraged to read the vignette from the MeSHdbi package for more details.
